HOW CAN I PROTECT MY BABY?

- Avoid sharing dishes, cups, or utensils during meal time.
- Avoid one-on-one close physical contact, such as kissing or hugging your baby, if you have been exposed or start having symptoms.
- Avoid sharing bedding or reusing dirty blankets, bibs, rags, etc.
- Wash your hands often or use an alcohol-based hand sanitizer before touching your baby or child.
- Clean and disinfect all reachable surfaces, toys, bottles, and other household items.
