

**City of St. Louis Department of Health
Influenza Surveillance Report
2018-2019 Influenza Season
Week 40 (10/1/18 – 10/06/18)**

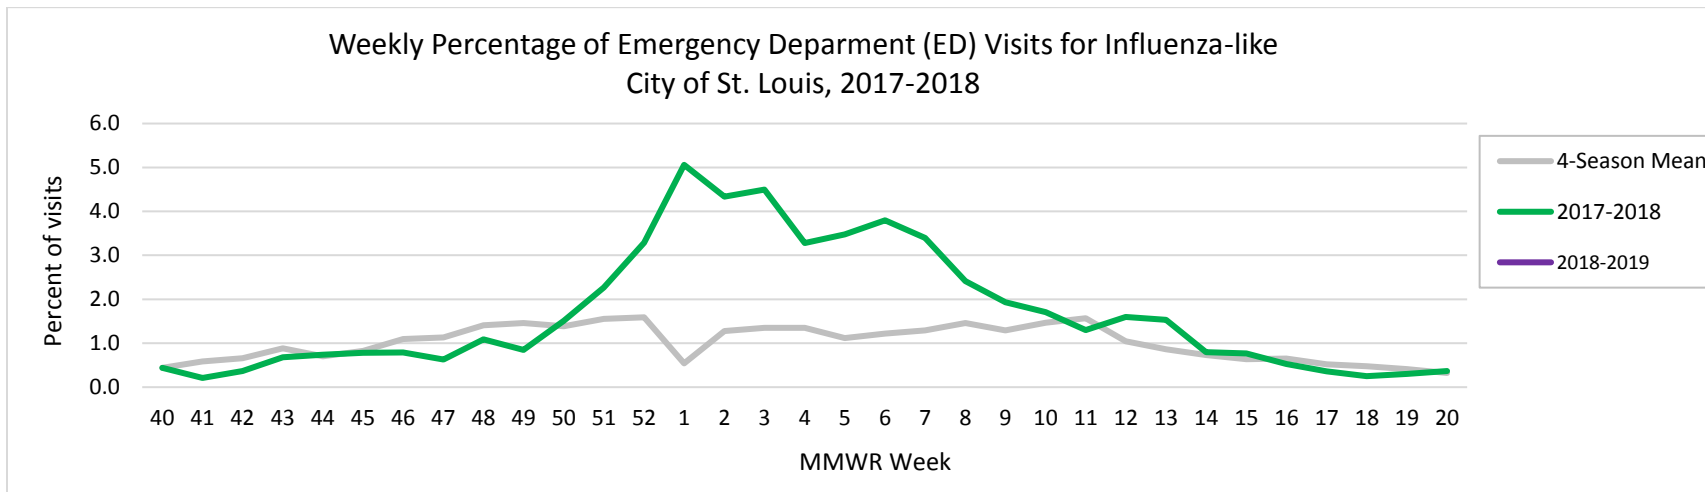

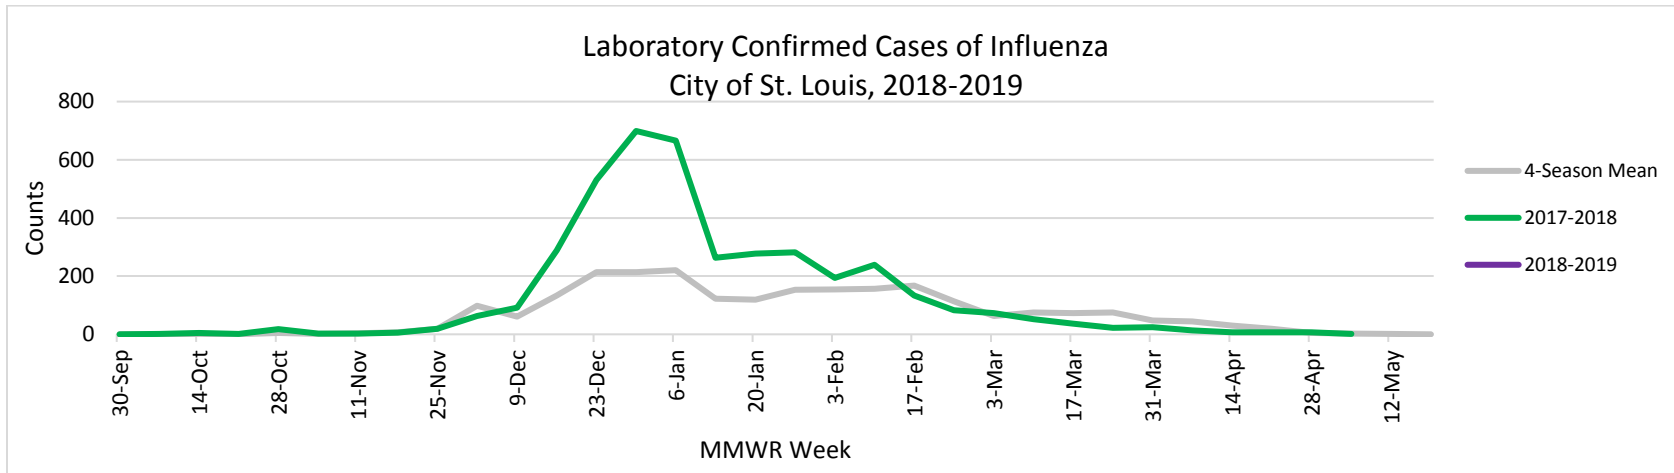

Data Notes

- Current data is provisional due to reporting delays.
- Case definitions are established by the Missouri Department of Health and Senior Services' (DHSS) Communicable Disease Investigation Reference Manual. The totals reflect the number of cases reported (confirmed, probable, and suspect). Numbers from previous weeks are subject to change.
- Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.
- The 2018-2019 influenza season runs from 2018 MMWR Week 40 (Week ending September 30th, 2018) through 2018 MMWR Week 20 (week ending May 18th, 2019).

City of St. Louis Department of Health Influenza Surveillance Report 2018-2019 Influenza Season Week 40 (10/1/18 – 10/06/18)

There have been no cases of influenza reported in the city since September 30, 2018. The following graphs compare the 2017-2018 influenza season to the 2018-2019 influenza season along with the previous four seasons.
