St. Louis, MO 63102
(314) 241-1400

Dear Ms. Emigh:

The Department of Health has completed the preliminary inspection and assessment of the housing and health conditions of your horses. The complete findings and recommendations are attached.

Under the laws of the City of St. Louis, including the Charter and the City of St. Louis Revised Code 10.20.016 and 10.20.017, the Health Department and the Health Commissioner have the authority to regulate animal housing and to protect the welfare of all animals in the city. This necessarily includes the authority to set minimum standards for housing, to ensure that no unfit animal is allowed to work, and to ensure that animals are not overloaded or overworked.

Pursuant to that authority, the Health Department conducted an inspection of your animals and housing.

Accordingly, you must continue to:

1. Not work each horse more than eight hours per day, five days per week. Each horse shall receive no less than five weeks of vacation or furlough every twelve months at your facility in Jefferson County.
2. Ensure that your carriage horse stables operating within the city are held to the current standards and best practices of equine husbandry including but not limited to:
 - Adequate fresh air and ventilation (i.e. individual and industrial fans in good repair combined with windows, doors, grates, vents and eaves);
 - Fastidious cleaning practices to minimize horse exposure to dust, debris and odor;
 - Storage of food and bedding materials in an area separate from the horse barn; and
 - Each horse must have free access to a salt block.

Additionally, effective immediately you must:

St. Louis Carriage Company

1. Not work any horse when the Maximum Heat Index reaches 100 degrees for any single day.
2. Have a equine veterinarian available to respond within 15 minutes and the equine veterinarian should be able to respond to emergencies in an urgent and timely manner upon the department reporting to you that one of your horse is in apparent distress;
3. Make all veterinary and farrier records available for inspection where the horses are housed in the city; and
4. Allow for a scheduled monthly inspection and periodic unannounced inspections of your horses and barns at both your St. Louis City and County sites.

Sincerely,

Pamela Rice Walker, MPA, CPHA
Health Director
