

Technical Guidance Advisory No. 2
2015 Emergency Shelter Request for Proposals
March 4, 2015

- There is no categorical prohibition against Emergency Solutions Grant funding being used to contract for emergency shelter services at a facility situated outside the geographic boundaries of the Continuum of Care to whom the ESG funding has been granted. Thus, applicants may in response to this RFP propose to provide emergency shelter services at a facility situated outside of the City of St. Louis – although each such proposal will be reviewed for funding eligibility on a case-by-case basis.
