				3,
LEVEL		Benchmark - CDC Recommendations (https://www.cdc.gov/coronavirus/2019-ncov/community/correction-detention/guidance-correctional-detention.html) AND Minnesota benchmark (https://www.health.state.mn.us/diseases/coronavirus/guidejail.pdf)		March 10th ER Plan and follow-up directives (provided 2/12)
INTAKE				
		Temperature check - all entering - 100+ not allowed		all arrestees and visitors , 100.4 not allowed
		Verbal Screen - All Entering		all entering the building
		Test (type as medically indicated)		Offered
		14 day Individual Quarantine in a single cell		"Separated" for 14 days
		Routine symptom check while in quarantine		Symptom check done on intake, if found to have symptoms isolated and testing is offered

		<p>Viral Test recommended: symptomatic testing only, symptomatic and targeted asymptomatic testing, or facility-wide testing. In addition to testing of all symptomatic inmates, testing AND 14-day quarantine for the following groups:</p> <ol style="list-style-type: none"> 1. Inmates who are contacts of confirmed or suspected COVID-19 cases 2. New intakes to the facility 3. Inmates returning to the facility following public exposure (e. g., hospitalization, court appearances. (https://www.cdc.gov/coronavirus/2019-ncov/community/correction-detention/testing)) 		<p>All new intakes are screened for covid-19 symptoms, exposure, or recent positive test. Anyone found to be a PUI is placed on isolation and tested. In the event the detainee refuses testing they will complete an automatic 14 day isolation. Cellmates or confirmed contacts of COVID-19 cases are isolated and offered testing, if testing is refused automatic isolation for 14 days, all inmates are provided masks prior to going to public, if notified of exposure with proper PPE testing is offered, without proper PPE person is isolated and offered testing, if testing is refused automatic 14 day isolation. Testing is also provided to any inmate that requests with or without symptoms, if inmate reports symptoms he or she will be placed on isolation and tested. If testing is requested without symptoms test is administered and no isolation protocol is put into place.</p>
		<p>2 types of tests: 1. viral test - detects current infection (nasal or oral swabs or saliva); 2. antibody test - detects past infection (blood sample).</p>		<p>Only offer PCR nasal swab, antibody test not given at this time</p>
		<p>PPE provided, disposable or cloth masks, hand sanitizer, gloves, wipes</p>		<p>disposable medical masks /hand sanitizer/wipes</p>

		Social distancing, wear masks,		Wear masks out of cells, wash hands, wear gloves, sanitize area, social distancing, commercial company sanitizes common areas of both buildings bi-weekly
		Identify legally acceptable alternatives to in-person court appearances, such as virtual court, as a social distancing measure to reduce the risk of SARS-CoV-2		Video being utilized for pre-charge conferences
		Visitation - allowed in facilities w/no outbreak; temperature, screening, noncontact area, PPE, signage, 6 feet apart. If facility outbreak suspend in-person visits, programs and volunteers but allow video and calls. If the two week case rate is greater than 10 per 10,000, consider alternatives to in-person visits. . If a facility draws a large number of visitors from other counties, also assess those counties' case incidence.		Social visits suspended; legal req. allowed in noncontact area/disinfectant and wipes available; programs and volunteers suspended; 2 free 15 minute calls per week
		Social distancing, wear masks, limit cell occupancy, limit shared spaces		MSI single cells, Wear masks out of cells, wash hands, wear gloves, sanitize area, social distancing
		Routine symptom check		Daily medical pass for medications. Nurse wellness check within 24 hours. Doctor seen as needed.
		See testing protocol above		Offered
		PPE replaced		PPE replaced. Every detainee gets 2 masks in their monthly kit.
		If a + on Unit then 14 day quarantine for entire unit		
		Exercise		Rec and curfew from 10 pm to 1 am, access to fitness center suspended
		Meals flu protocol		flu protocol and social distancing
		Laundry flu protocol		flu protocol/detainee work crews deployed
		Disinfection		flu protocol/detainee work crews deployed, supplies available to all staff and detainees for all shifts
Suspect/Confirmed Cases				

		Put in place with other jurisdictions plans to not transfer C/S cases and close contacts between jurisdiction unless medical, overcrowding or security issues.		Using MSI for social distancing
		suspect/symptoms - standard precautions/PPE/isolation/negative pressure		suspect/symptoms - standard precautions/PPE/isolation/negative pressure
		Suspect/symptoms- PCR test		See testing procedure above
		mild symptoms in single cell w/solid walls and doors		isolated in neg. pressure or cell with doors and walls
		transfer to hospital if medically indicated		all confirmed positive cases are monitored by medical staff onsite transferred to local hospital if medically indicated
Release				
		verbal screen		
Staffing				
		Ongoing training/COVID19 info/Flu protocol/ER plan/Communications		Annual emergency plan training. Routine updates provided. ER plan activated.
		Same staff assigned to the same housing unit across shifts to prevent cross-contamination from units where infected individuals have been identified to units with no infections		
		PPE		Fit tested annually; provided with n95 masks, shields, hand sanitizer, wipes

		Test symptomatic staff. Exclude from work for 14 days and negative test. Asymptomatic staff test if: excluded from work due to contact with a COVID-19 case should be tested at day 12, and if the test is negative, may return to work after 14 days; a contact of a COVID-19 case and who must continue to work should wear a mask for source control and be tested at day 7 and day 12 after the date of last exposure to the case. Postivie test but asymptomatic excluded from work for 10 days.		
Facility Wide Testing				
		1. One+ inmates are confirmed to have COVID-19 and likely acquired the infection in the facility or significant staff and/or inmate exposures occurred. 2. Staff member tests positive for COVID-19 and worked in the facility while ill, worked in the 48 hours prior to developing symptoms, or worked in the 48 hours prior to testing (if asymptomatic). 3. No known positive inmates or staff if the facility is considered at high risk (e.g., shared staff with a COVID19-positive facility, high level of community transmission) to provide situational awareness in the facility and potentially identify asymptomatic cases early.		
		detailed guidance (https://www.cdc.gov/coronavirus/2019-ncov/hcp/broad-based-testing.html)		
Vaccine				
		Recommended for all staff		MO vaccinating state staff in phase Ia (1st responders)
		CDC states that for detainees facilities should follow state jurisdictional phase priority plans but they recommend that detainees be vaccinated at the same time as staff.		MO has placed state detainees in the last phase. Vaccination was offered to 65, 17 agreed to be vaccinated.
