

REPLACEMENT WINDOWS FOR LOCAL HISTORIC DISTRICTS

1. All-wood sash replacement kit (i.e. *Tilt-Pac*; *Zap-Pac*; etc.) that replicates the original window in configuration, size, dimension of members, placement within the opening; and trim.
2. All-wood replacement window that is installed by removing the existing window frame and which replicates the originals in configuration, size, dimension of members, placement and trim. **(See attached partial listing of conforming wood replacement windows).**

Note: Lafayette Square requires wood replacement windows on street-facing facades

3. The current non-wood historic replacement windows that have been approved by the Preservation Board are:
 - 1) Color-finished aluminum:
 - **Crown Industries M-1400** (aka Columbia C-3000)
 - **Quaker H300 Historic singlehung;**
 - **EFCO Historic doublehung;**
 - 2) Composite:
 - **Andersen “Renewal” doublehung** (full replacement)
- Note:** Any non-wood window that is not on the above list may be presented to the Preservation Board for approval; however, please be aware that any replacement window approved for use in the City’s historic districts must replicate historic doublehung windows in configuration, size, dimension of individual members, placement and trim.
