

**REQUEST FOR QUALIFICATIONS FOR PORT CONSULTANTS
ST. LOUIS PORT AUTHORITY**

Q & A's received as of December 22, 2015

Q. 1) Can you give us an idea on the relative size of projects that may fit under this consultancy agreement? Is there a cap on the “not-to-exceed” amount for an individual project, or will the consultancy agreement cover a wide range of project costs?

A. 1) Consulting services will cover a wide variety of projects, generally within a \$5,000 to \$100,000 contract-price range.

Q. 2) Will there be a defined term length for a firm to be a part of the short list if it is selected? I understand that the Port Authority may reconstitute the short list at any time, but is there a general idea/thought on how long such a term may last if no changes are made during its existence?

A. 2) The Authority anticipates a 3 to 5 year period for the list to remain active.

Q. 3) I assume that the short list will contain various types of firms including law firms for the Maritime Law projects, engineering consultants for the maritime engineering work, and real estate firms for Port Development work. If (a particular firm) would be fortunate to be selected to the short list (in a particular category), ... how many “slots” ... on the list (might there be) for (that particular category of) work?

A. 3) The Authority does not have a predetermined number of slots for each category.
