You can use Metro's new TripFinder at the stop to determine which direction and route to take. You may also want to consider walking to the station or parking your car in one of the nearby parking lots. This will help you avoid the hassle of driving and parking in busy areas.

Bikeways and Dedicated Bike Lanes

Bikeways and Dedicated Bike Lanes are designated routes for bicycling that are separate from motor vehicle traffic. They are often marked with signs or painted in a specific color. These routes are ideal for people who want to avoid motor vehicle traffic and enjoy a safer, more pleasant ride.

Bike Paths and Trails

Bike paths and trails are designed for non-motorized transportation and are often shared by both pedestrians and cyclists. They are typically located in parks or along riverfronts and are designed to be safe and comfortable for all users. Bike paths and trails are great for tourists and locals alike and are a great way to explore the city and its attractions.
