Product Description

The Powermatic PM3000B brings professional-grade performance and patented innovations to the 14" table saw arena. Three-phase power and a full 7.5 horsepower amount to a saw that is capable of ripping the thickest stock you can throw at it. The riving knife rises and lowers with the large blade, substantially reducing kickback risk. Both riving knife and blade guard each have a quick-release, so mounting and removing them is fast and tool-free. A wide-stance trunnion provides maximum rigidity for consistency and durability, while concave teeth on the trunnion gears promote smoother raising and tilting of the blade. Thanks to the Poly-V drive belt, you'll enjoy quieter, more efficient power transfer, virtually no vibration and less heat build-up. The redesigned arbor lock lever eliminates the need for two wrenches, and is easily accessible from above the table. Dust collection is exceptional, thanks to the built-in port, sloped cabinet floor and dust shroud around the blade. All controls are thoughtfully designed, including a stop button that can be easily knee-activated when necessary.

Features:

- Quick-release riving knife lever for hassle-free riving knife changes
- Matching beveled edge between table and extension wings
- Newly designed AccuFence system for precision cuts and easy adjustments
- Dust collection greatly improved over previous models
- Poly-V drive belt system delivers efficient, quiet operation
- Wide stance heavy-duty trunnion for stability and smooth blade adjustments
- Adjustable angle indicators (patent pending) on the blade bevel scale for repeatable bevel cuts
- Heavy-duty microadjustable miter gauge with aluminum extruded fence, for excellent workpiece guidance and fine angle adjustments
- CSA certified
